

Your evolution. Our expertise.

You're in great hands with TELUS Health

Complete and secure data conversion to TELUS Health EMR

We know what it takes for successful EMR data conversions. We work with you to understand your practice, and together we'll plan out training and support services – to meet your needs.

A customized approach

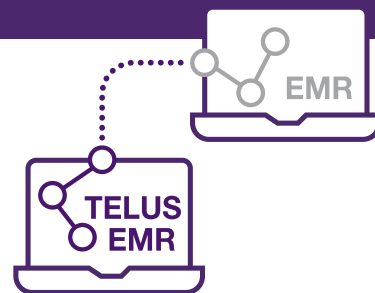

- With our database-to-database approach we ensure that no data is left behind
- Review data quality during testing to ensure no gaps or issues
- See and approve the results of your chart migration in a test environment before the final migration

Unmatched experience with data conversion

- Imported full clinical data from over 4 million charts, from 25 different source EMRs
- Performed migration of patient records during live system use to support ongoing clinic operations
- Converted and cleansed large volumes of EMR data beyond the basic specifications
- Industry's best conversion team in extracting and importing to TELUS Health EMR

Dedicated support from TELUS Health

- TELUS Health's dedicated National Data Team will partner with you and your team throughout the process to eliminate surprises and ensure a smooth transition

TELUS in Health

- \$2B invested in healthcare
- 21,000+ Canadian healthcare providers use TELUS EMRs
- 2,600+ dedicated team members
