

I've just downloaded the TELUS EMR Mobile App. It's one app that fits all – and it's totally FREE!

Sent

TELUS EMR Mobile

Access your EMR anywhere, anytime – from any Apple® or Android™ device.

The TELUS EMR mobile is a free application that lets you upload photos directly to patient charts, quickly view basic patient data and encounter notes or check your schedule or directly phone a patient – all in real time from your Apple or Android device!

Convenient

- Take a photo, add a comment and post it to the chart directly from your phone.
- Check your schedule to plan your day and see what is coming.
- Access your address book while in the community to reach providers involved with the patient's care.
- Supported on Apple and Android devices.

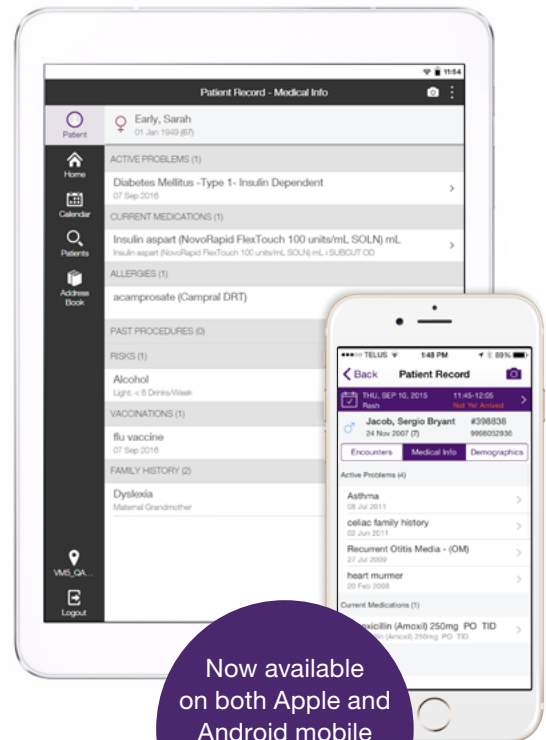

Meaningful

- Clinically document patient conditions by capturing photos and uploading directly to the patient's chart in the EMR.
- Access basic patient information, including health conditions, medications, and past consultations.
- Leverage continuous developments on the app; enhancements will include lab results, prescriptions and more – right at your fingertips.

User-friendly

- Designed to present information simply and clearly in a mobile form factor; patient health information and your calendar are available at-a-glance.
- Designed to be used on any mobile device so you don't need to change your habits (phone or tablet, Apple or Android).

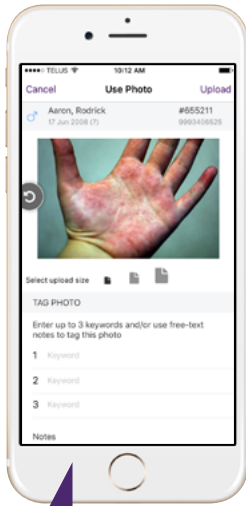

Now available on both Apple and Android mobile devices.

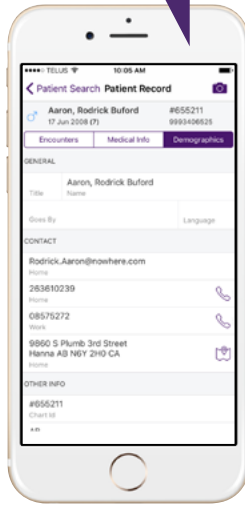

Unlock the full potential of your practice's seamless workflow – anywhere, anytime, on any Apple or Android mobile device.

Quickly access patient history, medical profiles & demographics

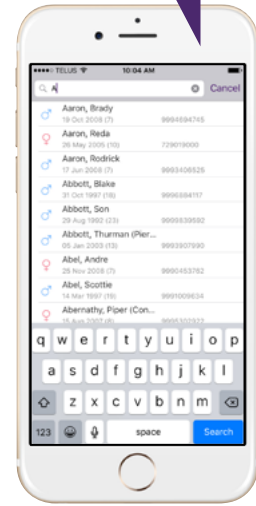

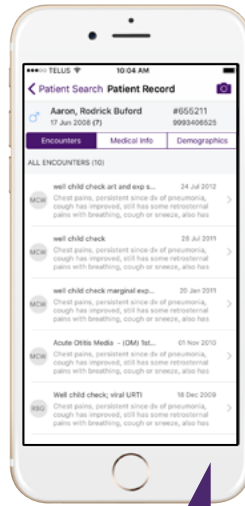

Locate and/or phone patients, consultants, and medical facilities stored in your EMR

Upload photos directly to the patient's chart

See your visit notes and access patient data in your EMR

Download the app. Pair your device. Get mobile.
