Introduction

Effective 17-May-2018, with very few exceptions, all Rx's adjudicated through Alberta Blue Cross and Alberta Social Services with a Days Supply of less than 28 days must include two Special Services Codes (SSC) and are limited to a maximum number of dispensing fees.

In addition, pharmacies will only be allowed 2 dispensing fees per drug within a 28 day period and only 3 dispensing fees on any single day for one-day supply Rx's. Should this be exceeded, the dispensing fee must be set to \$0.00 in order to prevent an outright rejection from the plan.

It is expected that the majority of pharmacies that are currently performing weekly dispensing will change to biweekly or monthly to avoid the loss of any fees however, should any continue with weekly fills, there will be a need to set the dispensing fee to 0.00 for those subsequent fills.

Consent records are needed to process any Rx for less than 28 days' supply. This must have a valid FOD reason or 'Do Not Qualify'.

Implementation

4 Special Service codes captions have been changed for the Alberta Blue Cross or Alberta Social Services plans.

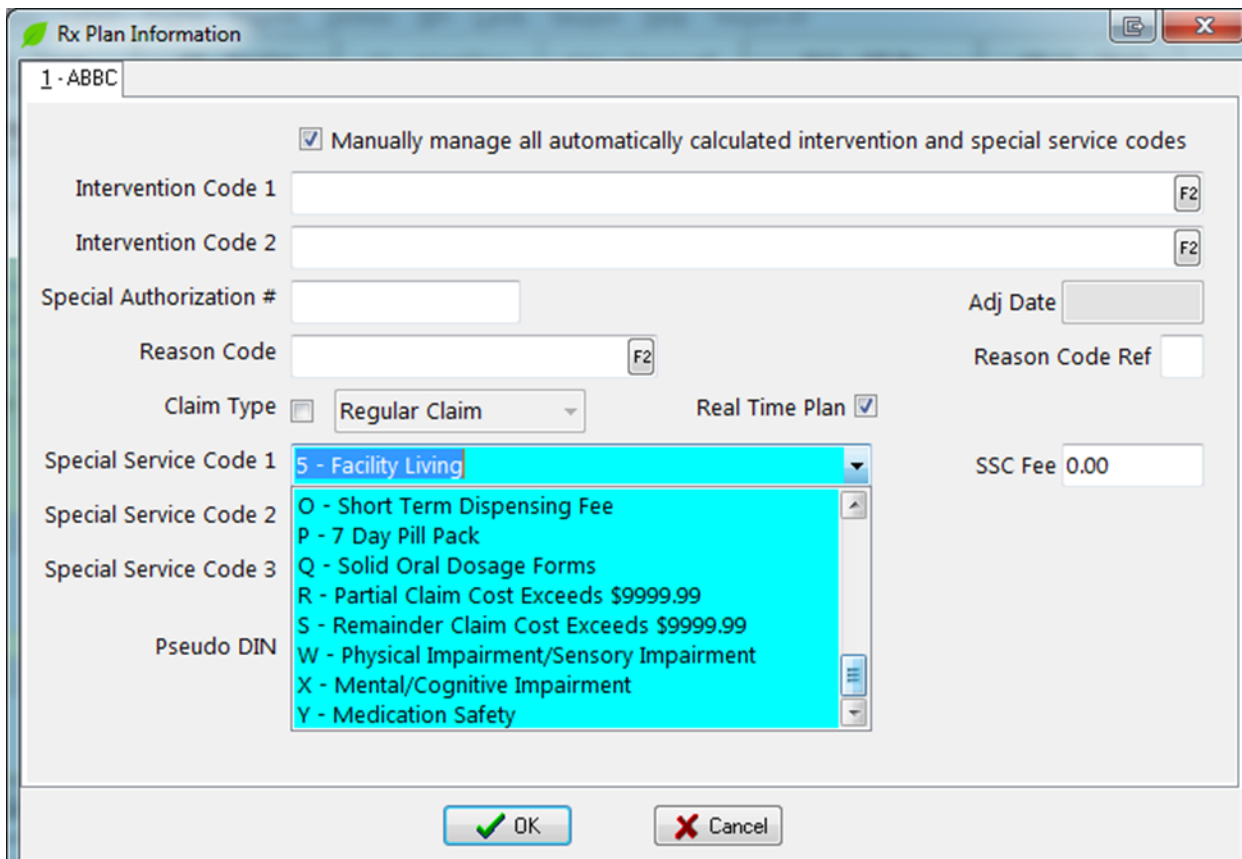

Special Service Codes:

- 5 - Facility Living**
- W - Physical Impairment/Sensory Impairment**
- X - Mental/Cognitive Impairment**
- Y - Medication Safety**

These Special Service Codes are now available on the **Rx Plan Information** screen when the patient has the Alberta Blue Cross or Alberta Social Services plan.

Frequency Codes:

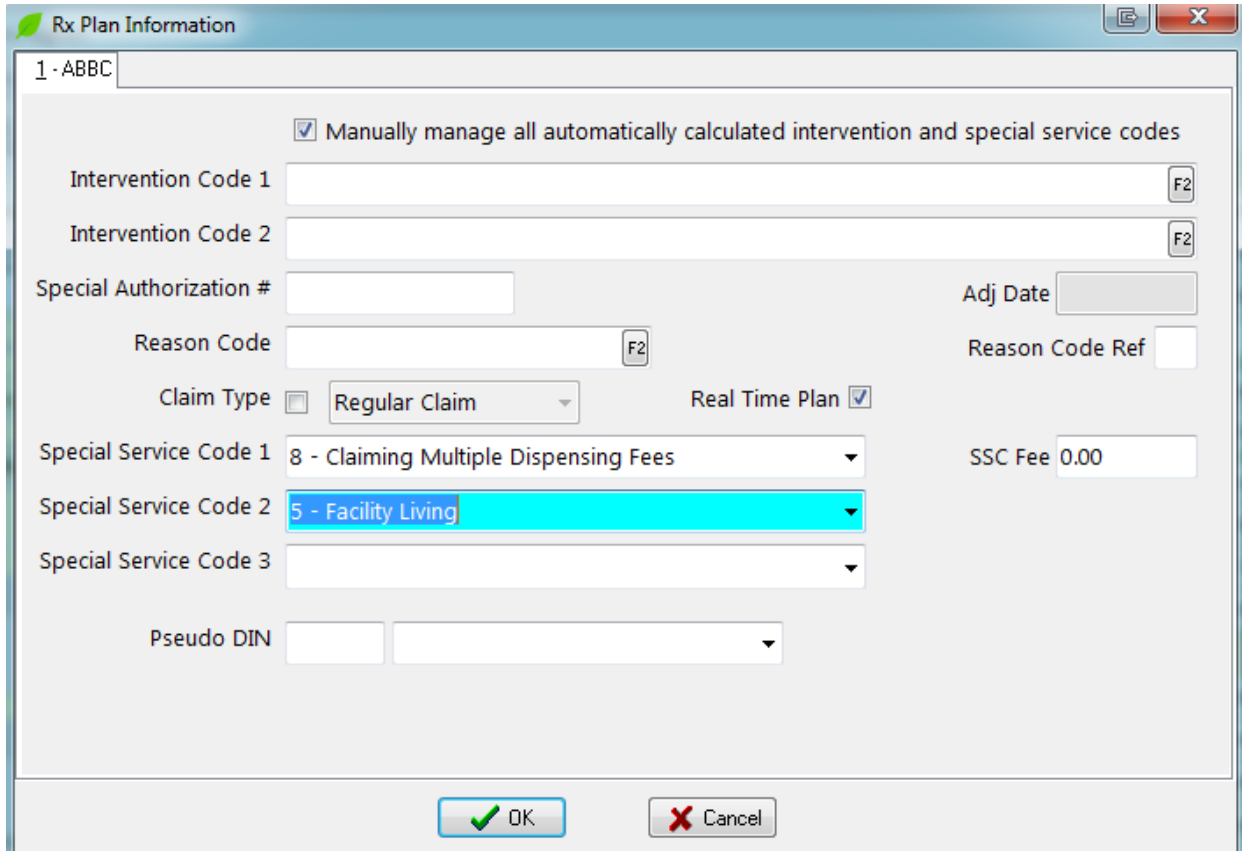

- 8 – Days’ Supply = 1 Claiming Multiple Dispensing Fees**
- O (letter) – Days’ supply = 2 to 27 Short Term Dispensing Fee**

The screenshot shows the 'Rx Plan Information' window for patient '1 - ABBC'. A checkbox is checked for 'Manually manage all automatically calculated intervention and special service codes'. Fields include Intervention Code 1 and 2 (both with 'F2' buttons), Special Authorization #, Reason Code (with 'F2' button), Claim Type (set to 'Regular Claim'), Real Time Plan (checked), and SSC Fee (0.00). A dropdown menu for 'Special Service Code 1' is open, showing a list of codes: 5 - Facility Living, O - Short Term Dispensing Fee, P - 7 Day Pill Pack, Q - Solid Oral Dosage Forms, R - Partial Claim Cost Exceeds \$9999.99, S - Remainder Claim Cost Exceeds \$9999.99, W - Physical Impairment/Sensory Impairment, X - Mental/Cognitive Impairment, and Y - Medication Safety. 'OK' and 'Cancel' buttons are at the bottom.

Rxs with a Days Supply of 1 and where frequent dispensing applies

The Combination of SSC 8 (Claiming Multiple Dispensing Fees) + SSC 5 or SSC W or SSC X or SSC Y will be applied

Rxs with a Days Supply of 2 to 27 where frequent dispensing applies

The Combination of SSC O (Short Term Dispensing Fee) + SSC 5 or SSC W or SSC X or SSC Y will be applied.

The applicable combinations are set when the Alberta Frequency of Dispensing consent eligibility criteria is selected based on the days' supply.

The screenshot shows a pharmacy software interface with a patient search for Agnes Spiro and a drug search for Pariet (Rabeprazole Sodium). A pop-up window titled 'Rx Plan Information' is open, showing the following details:

- Intervention Code 1: [Highlighted]
- Intervention Code 2: [Empty]
- Special Authorization #: [Empty]
- Reason Code: [Empty]
- Claim Type: Regular Claim
- Real Time Plan:
- Special Service Code 1: O - Short Term Dispensing Fee
- Special Service Code 2: 5 - Facility Living
- Special Service Code 3: [Empty]
- Pseudo DIN: [Empty]
- SSC Fee: 0.00

Interactive Rx Fill

When a patient has an Alberta Blue Cross or Alberta Social Services Plan and the Drug not Methadone, Soboxone or a drug that attracts a zero Rx fee (e.g. Diabetic supplies, nutritional products and a drug that is in a drug grouping).

Drug Grouping:

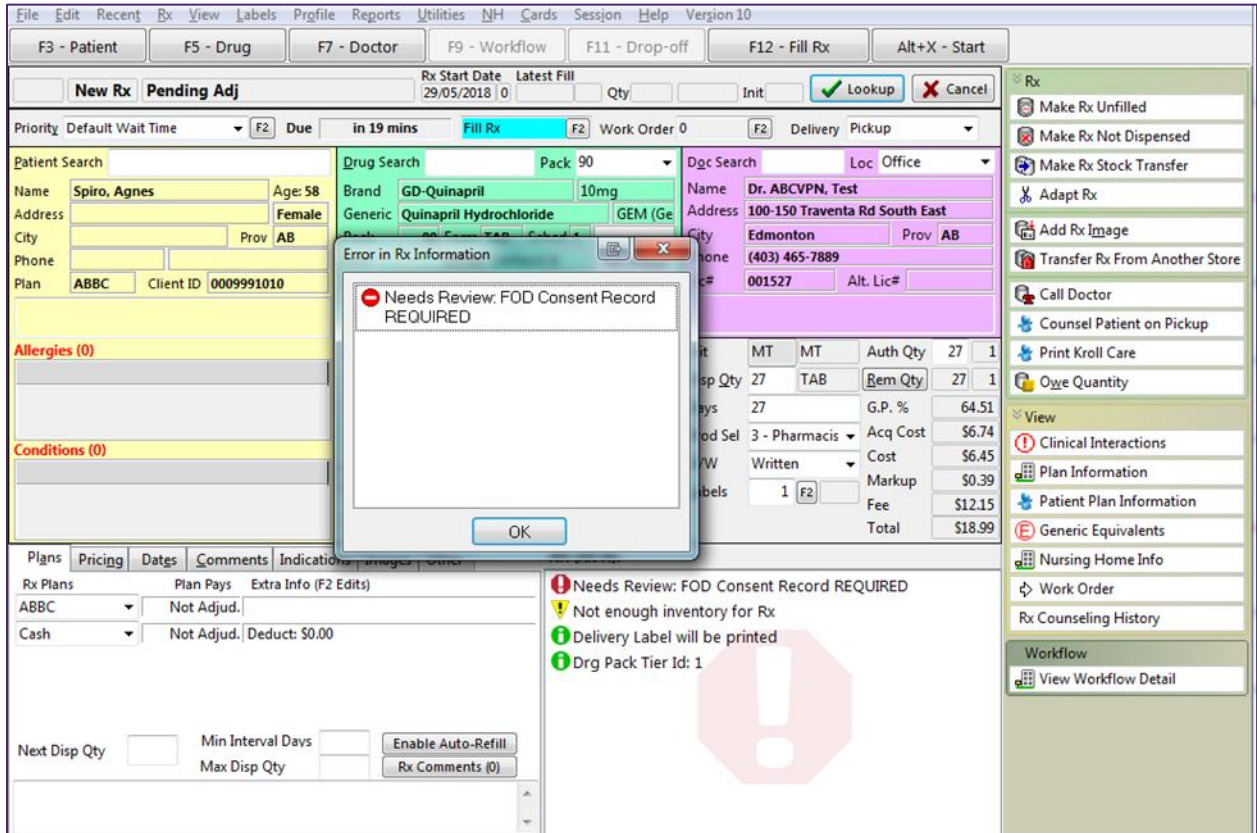

A drug grouping is based on the Drug Product Database (DPD) Active Ingredient Group (AIG). An AIG is a product that has the same active ingredient(s) and ingredient strength(s). Therefore, two different strengths of the same drug are considered as two separate drug groupings. However, two different brands of the same drug at the same strength are considered the same drug grouping

1. When a prescription is created with a Days supply of less than 28 days, a hard halt message is displayed in the Warnings/Message box – Needs Review: FOD Consent Record REQUIRED.

The screenshot shows a pharmacy software interface with the following details:

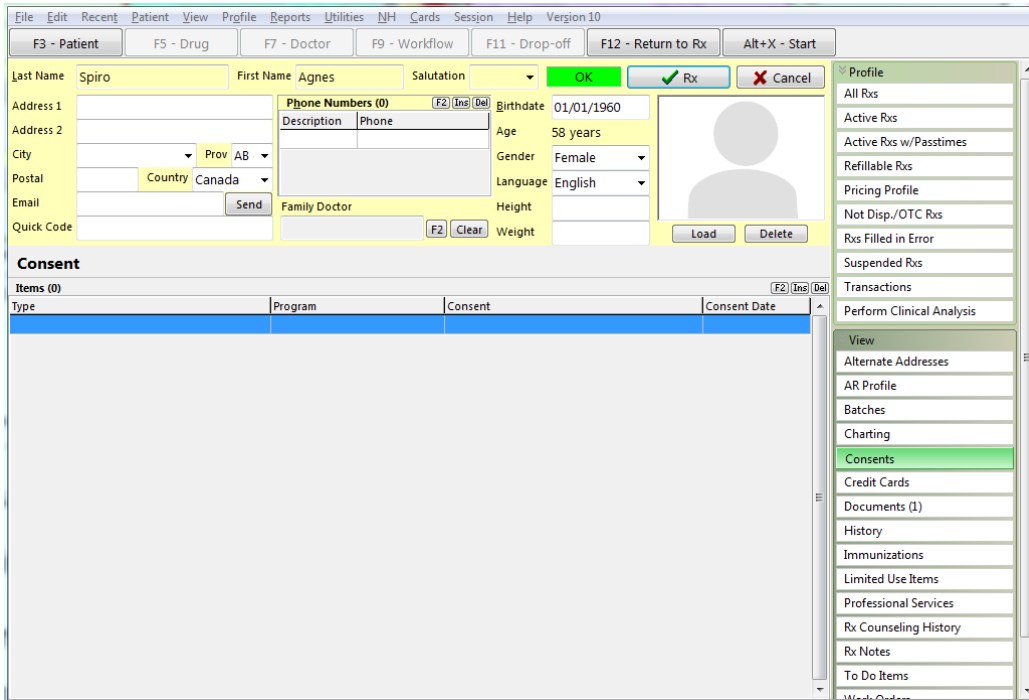

- Menu:** File, Edit, Recent, Rx, View, Labels, Profile, Reports, Utilities, NH, Cards, Session, Help, Version 10
- Buttons:** F3 - Patient, F5 - Drug, F7 - Doctor, F9 - Workflow, F11 - Drop-off, F12 - Fill Rx, Alt+X - Start
- Form Fields:**
 - Patient Search: Name Spiro, Agnes, Age 58, Female, Address, City, Prov AB, Phone, Plan ABBC, Client ID 0009991010
 - Drug Search: Brand GD-Quinapril, 10mg, Generic Quinapril Hydrochloride, GEM (Ge), Pack 90 Form TAB Sched 1, MLP \$20.88 OnHand 0, DIN 02290995, Min Qty 0
 - Dr. Search: Name Dr. ABCVPN, Test, Address 100-150 Traventa Rd South East, City Edmonton, Prov AB, Phone (403) 465-7889, Lic# 001527, Alt. Lic#

 - Pricing: Cash, Not Adjud., Deduct: \$0.00
 - Next Disp Qty, Min Interval Days, Max Disp Qty, Enable Auto-Refill, Rx Comments (0)

- This hard halt message prevents the user from filling the Rx without inserting an Albert Frequency of Dispensing record. Clicking F12 when this hard halt is displayed, results in a dialog form with the same warning.

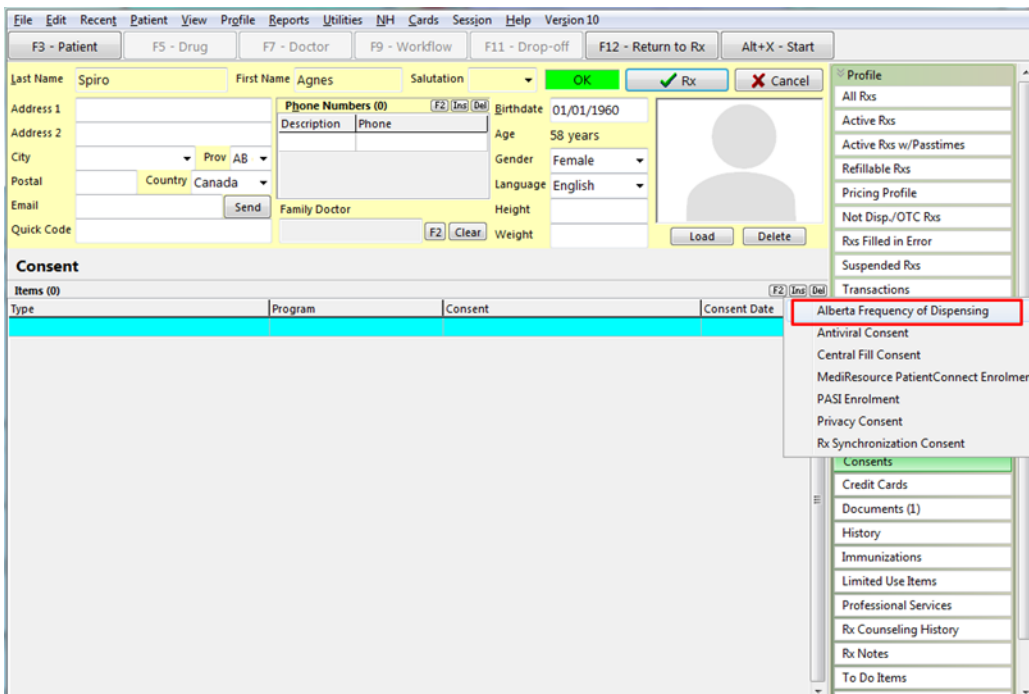

To override this warning, the user is required to add an Albert Frequency of Dispensing record.

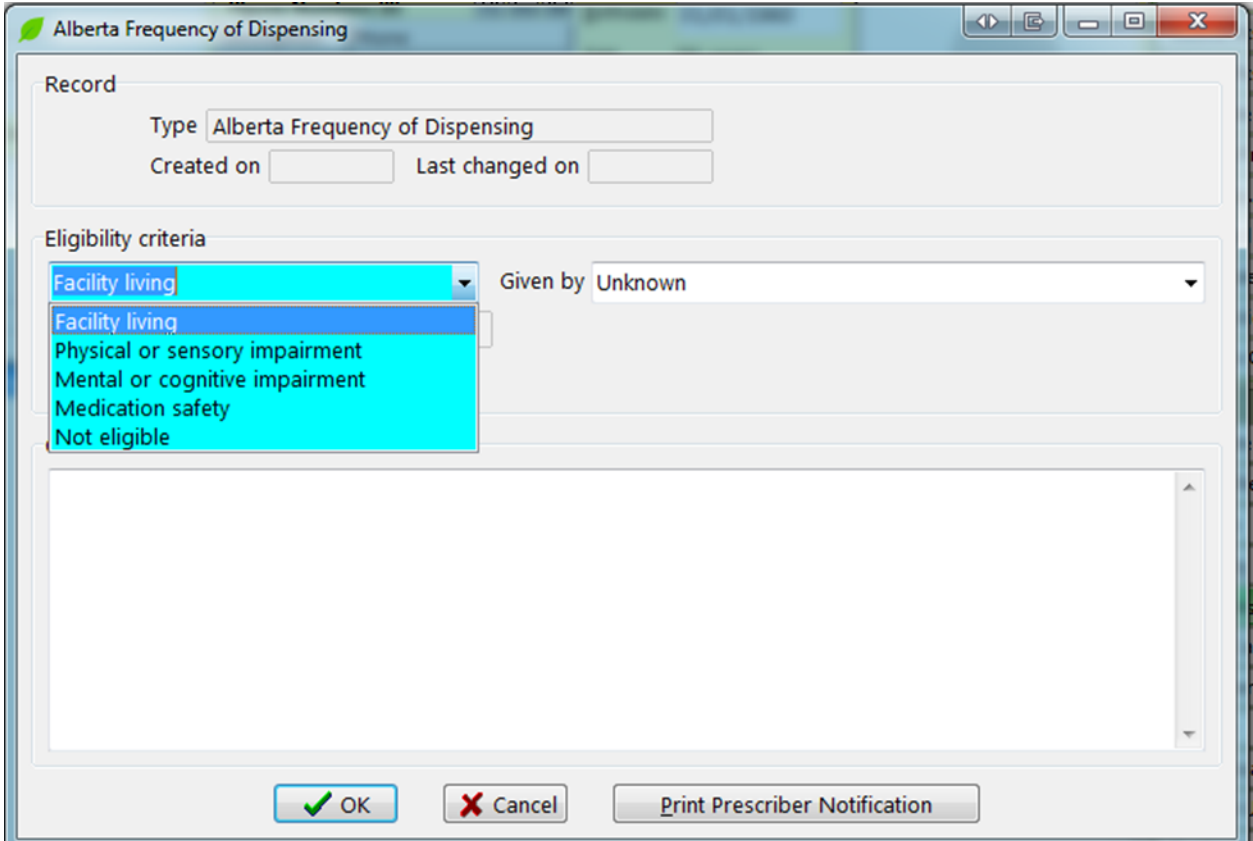

3. Navigate to the Patient Card by clicking F3 and click **Consents**.

4. Click **Ins** button and select 'Alberta Frequency of Dispensing'.

5. On the 'Alberta Frequency of Dispensing' screen, select a record from the list of eligibility criteria. Click OK.

9. Under the **Plans > Extra Info (F2 Edits)**, SSC: O5 is displayed.

The screenshot displays a pharmacy management system interface. At the top, there are menu options like 'File', 'Edit', 'Recent', etc., and a toolbar with buttons for 'New Rx', 'Pending Adj', 'Lookup', and 'Cancel'. Below this, there are tabs for 'F3 - Patient', 'F5 - Drug', 'F7 - Doctor', 'F9 - Workflow', 'F11 - Drop-off', and 'F12 - Fill Rx'. The main area is divided into several sections:

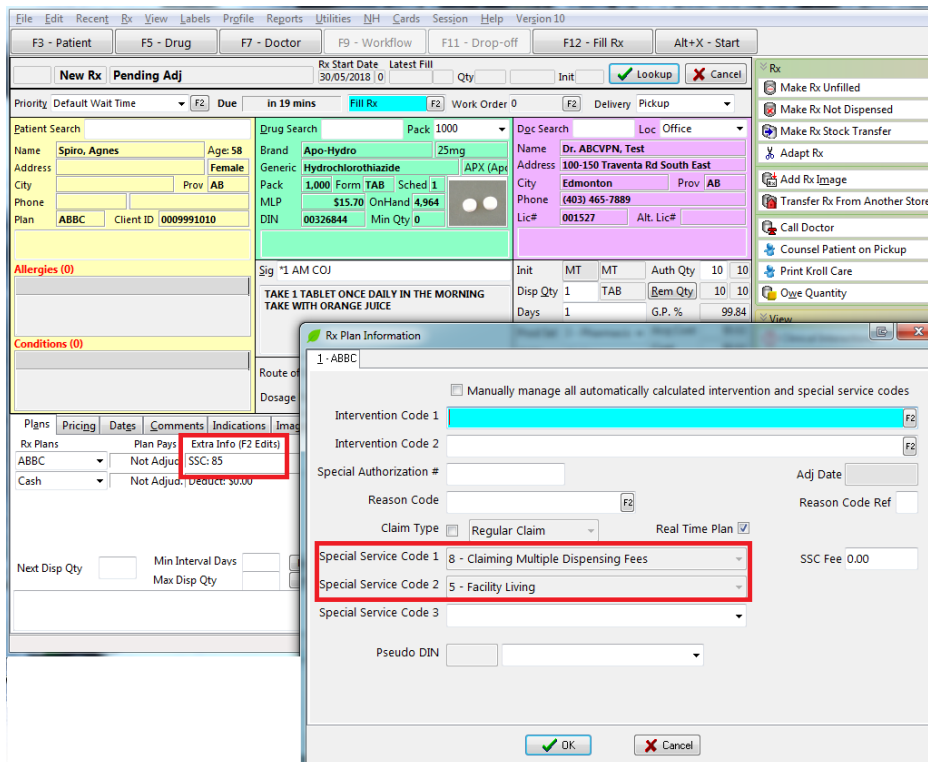

- Patient Search:** Name: Spiro, Agnes; Age: 58; Address: [blank]; City: [blank]; Plan: ABBC; Client ID: 0009991010.
- Drug Search:** Brand: GD-Quinapril; Generic: Quinapril Hydrochloride; Pack: 90 Form TAB; Din: 02290995; Min Qty: 0.
- Dr. Search:** Name: Dr. ABCVFN, Test; Address: 100-150 Traventa Rd South East; City: Edmonton; Phone: (403) 465-7889; Lic#: 001527.
- Instructions:** Sig: *1; TAKE 1 TABLET ONCE DAILY.
- Route of Admin:** Oral; **Dosage Form:** Tablet.
- Tablets:** A table showing 'MT' for 27 days, with 'Auth Qty' and 'Rem Qty' both at 27.
- Costs:** A table showing 'Acq Cost' (\$6.74), 'Cost' (\$6.45), 'Markup' (\$0.39), 'Fee' (\$12.15), and 'Total' (\$18.99).
- Plans > Extra Info (F2 Edits):** A table with columns 'Plans', 'Pricing', 'Dates', 'Comments', 'Indications', 'Images', and 'Other'. The 'Indications' column contains 'SSC: O5', which is highlighted with a red box.
- Warnings:** A yellow warning triangle with an exclamation mark and the text: 'NH (Alt-N): Not enough inventory for Rx. Delivery Label will be printed. Drg Pack Tier Id: 1'.
- Right Panel:** A vertical list of actions including 'Make Rx Unfilled', 'Make Rx Not Dispensed', 'Add Rx Image', 'Call Doctor', 'Print Kroll Care', 'Owe Quantity', 'Clinical Interactions', 'Plan Information', 'Patient Plan Information', 'Generic Equivalents', 'Nursing Home Info', 'Work Order', 'Rx Counseling History', and 'View Workflow Detail'.

10. Click on **Plan Information** in the right navigation panel and on the **Rx Plan Information form**,

- Special Service Code 1 – field is populated with **O- Short Term Dispensing Fee**
- Special Service Code 2 – field is populated with **5 – Facility Living**

NOTE :

- If you access the patient consent record and change the eligibility criteria record to Physical or sensory impairment, save changes and return to the Rx card, the 'Extra Info (F2 Edits)' field will display **SSC: OW**.
- If eligibility criteria record is changed to Mental/Cognitive Impairment, the 'Extra Info (F2 Edits)' field will display **SSC: OX**.
- If eligibility criteria record is changed to Medication safety, the 'Extra Info (F2 Edits)' field will display **SSC: OY**.
- If eligibility criteria record is changed to Not eligible the 'Extra Info (F2 Edits)' field will display **SSC: O**.
- If the Rx is created using a 1 day supply with frequency of dispensing eligibility set to Facility Living, the 'Extra Info (F2 Edits)' field, will display **SSC: 85**.
- If eligibility criteria is set to Not eligible only **SSC:8** is displayed

FOD Consent Record has expired warning

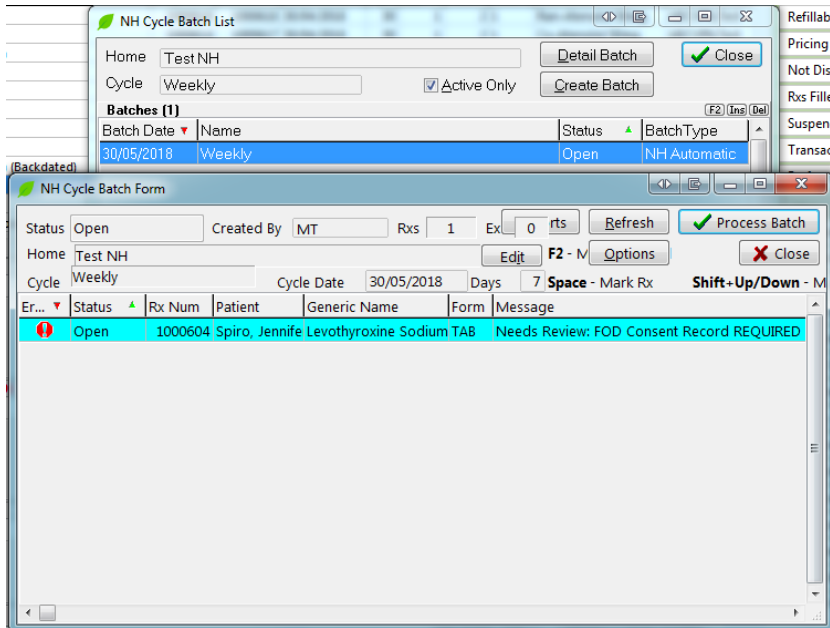

The warning displayed in the Batch form is Needs Review: FOD Consent EXPIRED DD/MM/YYYY

A new FOD consent record has to be added to the patient's consent profile to allow Rx to be filled.

Batch mode

In batch mode where no FOD consent exists and drug is in a drug grouping and days supply is less than 28 days, the warning message Needs Review: FOD Consent Record REQUIRED is displayed in the NH Cycle Batch Form

An attempt to process the batch without adding a FOD Consent Record results in an Information Message dialog box being displayed with text: You cannot process a batch while Rxs still have errors.

Modifying the Rx in another session and adding applicable FOD Consent Record to the patient card, allows batch processing to proceed. Another way to do this is to add the FOD Consent Record to the patient card in another session and then simply refresh the NH Cycle Batch Form.

FOD Consent Record has expired

The warning displayed in the Batch form is Needs Review: FOD Consent EXPIRED DD/MM/YYYY

A new FOD consent record has to be added to the patient's consent profile to allow batch processing to proceed.

Er...	Status	Rx Num	Patient	Generic Name	Form	Message
	Open	1000642	Spiro, Agnes	Venlafaxine 150mg	CAP	Needs Review: FOD Consent EXPIRED 23/05/2018

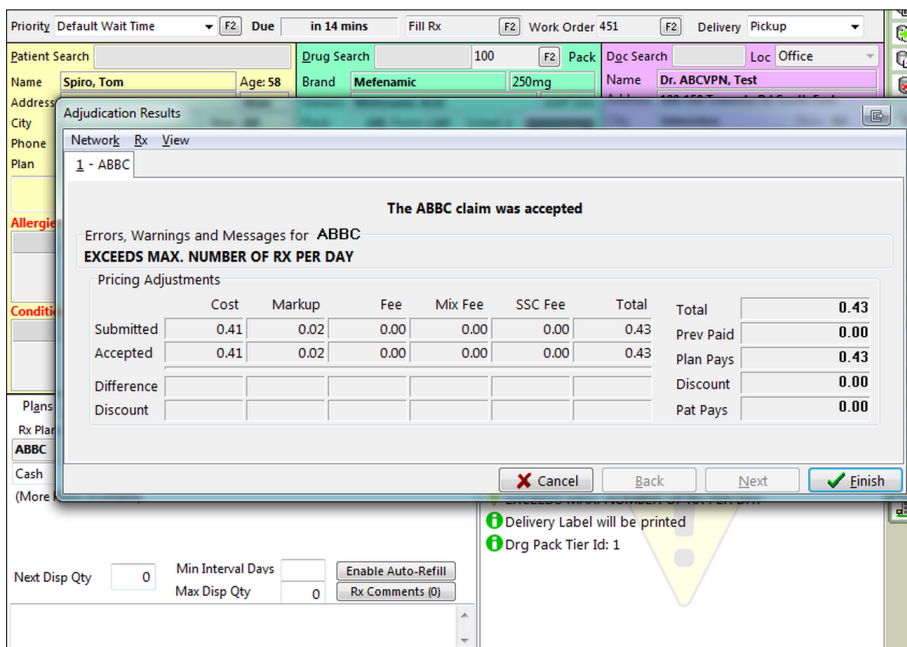

Zero fee behaviour where Rx Days supply = 1

A valid Alberta Frequency of Dispensing Consent record must be active under the patient in order for the automated behavior to execute.

1. Rx has been filled at 3 other pharmacies on the same day and the Rx is being filled a fourth time at your pharmacy. Kroll sends the Rx fee which gets rejected by Albert Blue Cross/Alberta Social Services plan. The error message appears RA (EXCEEDS MAX. NUMBER OF RX PER DAY).

NOTE: When the claim rejection happens, the claim is reversed in the background and re-submitted without the Rx Fee, so the user is not presented with the rejected response.

2. On the Adjudication response form, below [Errors, Warnings and Messages for subplan] the text - EXCEEDS MAX. NUMBER OF RX PER DAY is displayed

Priority: Default Wait Time | F2 | Due: in 14 mins | Fill Rx | F2 | Work Order 451 | F2 | Delivery: Pickup

3. Detailing the Rx transaction record displays the rejected claim record with error code RA and the accepted claim with no error code.

Albert Blue Cross/Alberta Social Services plan allows overriding the Exceed Max. Number of Rx per day by using the intervention code = UT up to 4 times per drug grouping per person per floating year. All other claims submitted with the UT code thereafter will be rejected.

The screenshot displays a software interface with several windows. The main window is titled 'Rx Plan Adjudication History' and shows a table of adjudication records for refill number 1000641. Below it, a 'Detail' window shows a 'Refill History' table for original Rx number 1000639. An 'Rx Plan Detail Form' window is also open, showing 'Billing Detail' for refill number 1000641.

Rx Plan Adjudication History

Date/Time	Trace Num	Inter	Response	Errors	Details/Messages
02/05/2018 09:34:42	1123		Accepted		
02/05/2018 09:34:37	1122		Rejected	RA	

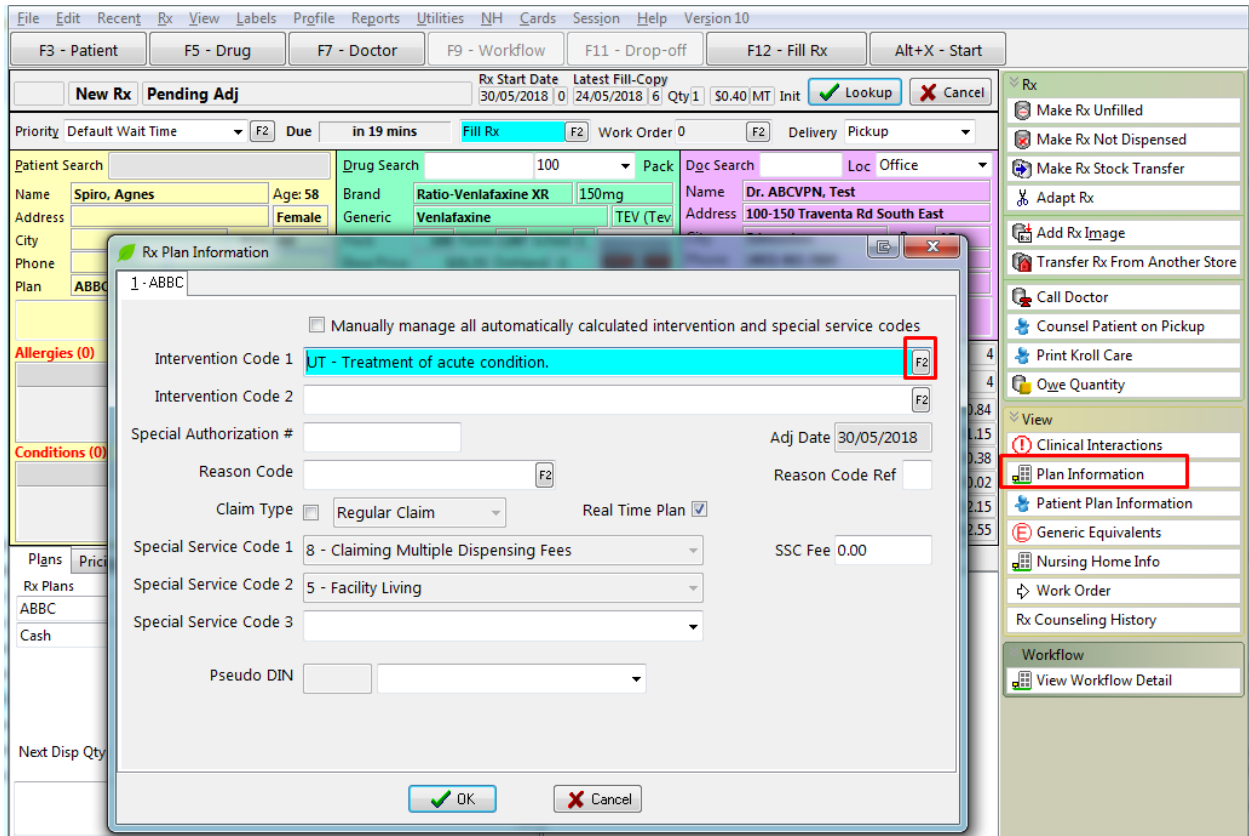

Refill History for Original Rx number 1000639

Tx	Status	Fill Date	Qty	Auth	Rem	Drug Name	Days	Cost	Markup	Fee	Total
1000641		02/05/2018	1	7	5	Mefenamic 250mg	1	\$0.41	\$0.02	\$0.00	\$0.43
1000639											\$0.43

Billing Detail for Refill number 1000641

Type	Sub Plan Code	Seq	Adj Date	Interventions	SSC	Pays	Adj State
Fill	ABBC	1	02/05/2018		8	\$0.43	Done
Fill	Cash	2	02/05/2018			\$0.00	Done

- In Kroll, the user will have to cancel the Rx, call it up to refill it, access the Rx Plan Information form and then add the UT intervention code before resubmitting the claim.

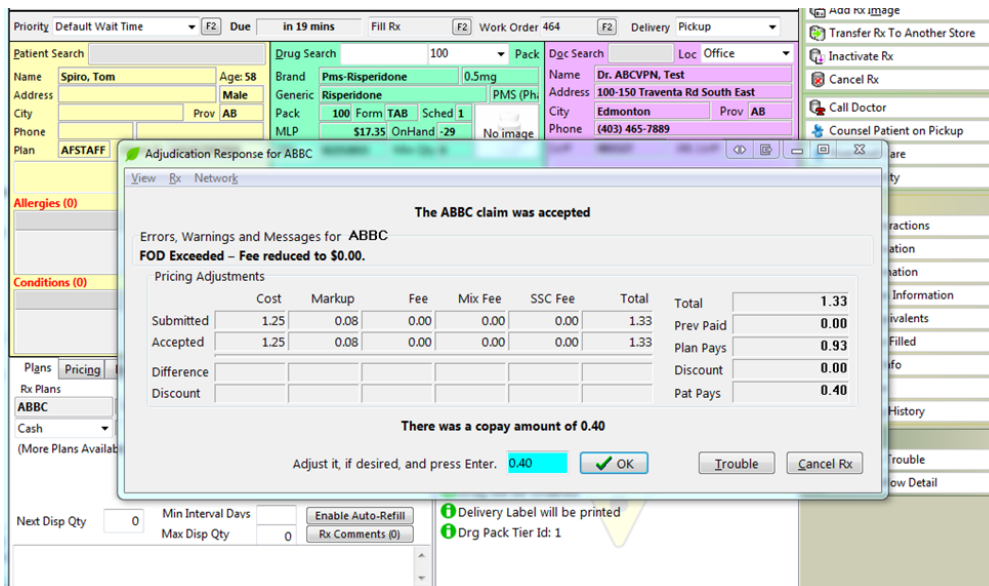

NOTE: The UT intervention code is not available on claim rejection i.e. you won't be able to add it to a rejected claim on the adjudication response form. You also cannot use UT to override a duplicate claim response

Zero fee behaviour where Rx Days supply = 2 to 27

A valid Alberta Frequency of Dispensing Consent record must be active under the patient in order for the automated behavior to execute.

1. Rx has been filled twice already in a 27 day period. The Rx is being filled a third time at your pharmacy in the same time period. Kroll sends the Rx fee which gets rejected by Albert Blue Cross/Alberta Social Services plan. The Error code returned = 87 (EXCEEDS MAX # OF PROF FEES FOR THIS DRUG)
2. When the claim rejection happens, the claim is reversed in the background and re-submitted without the Rx Fee, so the user is not presented with the rejected response.

Dear **Dr. Test ABCVPM**;

During the course of our interactions with the above named patient and/or discussions with their caregiver, I have come to the conclusion that Agnes Spiro will be enrolled in the frequent dispensing program for the following reason:

- Facility living

As a mechanism to manage this situation, I will be dispensing Agnes Spiro's prescriptions in 30 days supply and will be closely monitoring their fill frequency to ensure that the medications are being consumed correctly. Any issues identified will be addressed and shared with yourself.

If there are any questions, please do not hesitate to contact me at (604) 270-9745.

Regards;

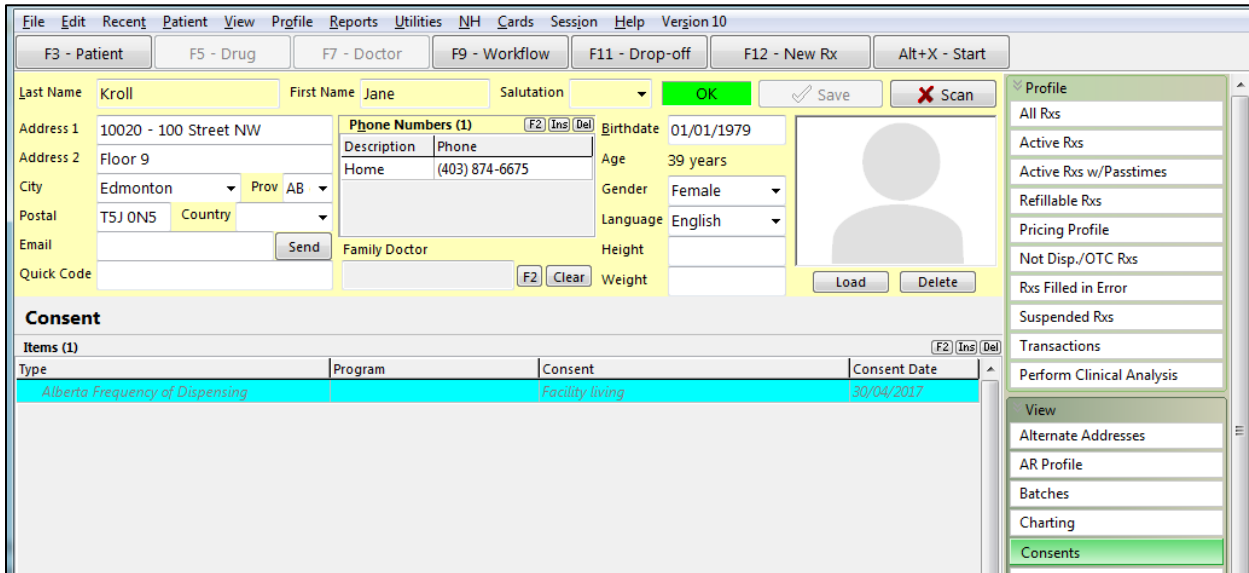

Pharmacist: **Kroll Pharmacist**
