Influenza Immunization Drug Cards – Ontario (2021/22)

With the introduction of our Influenza Immunization module, some significant changes must be made to the drug cards for the Influenza Immunization products your pharmacy uses.

The immunization formulary you have been provided may include drug records that already exist in your system; if this is the case, duplicate drug cards will be inserted in your system. Manual changes must be made to the correct drug card to ensure the correct product is selected when documenting and billing immunizations.

It is your responsibility to ensure the values in the Influenza drug cards are set as follows and that duplicate drug cards are managed appropriately.

Identifying Duplicate Drug Records

1. Search for an Influenza immunization drug. If there are duplicate drugs in your system, multiple records will appear in the drug search screen.

In the example below, there are three drug records in the system associated with DIN 02420643.

The screenshot shows a search interface with the following elements:

- Menu: File, Edit, Search, Utilities, NH, Cards, Session, Help
- Function buttons: F3 - Patient, F5 - Drug, F7 - Doctor, F9 - Workflow, F11 - Drop-off, F12 - New Rx, Alt+X - Start
- Search Criteria: Mixture Edit Ins Insert Searching By: **DIN**
- Search Input: 02420643 (highlighted with a red box) Cancel Copy Drug Advanced 3 Records Found
- Advanced Search:
 - Show Packs: Only Active, Only InActive, All
 - Generic Name:
 - Drug Group:
 - Drug Price Group:
 - Form:
 - Manuf:
 - Sched:
 - Show All Drug Pack Tiers:
- Table of Results:

#	BrandName	GenericName	Strength	Pack Size	DIN	Form	Manufacturer	On Hand
1	Fluzone Quadrivalent		15mcg	5	02420643	ML (Suspe SAO (Sanofi Pasteur Limited))		
2	Fluzone Quadrivalent		15mcg	0.5	02420643	ML (Prefilli SAO (Sanofi Pasteur Limited))		
3	Fluzone Quadrivalent Influenza Vaccine (GOVN'T)		15mcg	1	02420643	ML (Syring SAO (Sanofi Pasteur Limited))		

- Call up each drug record that **does not** have the correct pack size and uncheck the **Pack Active** flag.

General	Ordering	UPCs	Plans	Usage	Old Costs	Counselling	Kroll Care
Packs (1)	(F2) (Ins) (Del)	Pack Size	1	<input checked="" type="checkbox"/> Pack Active	<input type="checkbox"/> Front Store		
		Quick Code		<input type="checkbox"/> Only allow manual price changes			
		Purchase	\$0.00	Default Vendor	Default (McKesson)		

- When all duplicate drug records have been inactivated, these drug records will not appear in the drug search results unless you perform an advanced search for all packs; inactive drug packs will appear in red text.

3	Fluzone Quadrivalent Influenza Vaccine (GOV'N'T)		15mcg	1	02420643	ML (Syring	SAO (Sanofi Pasteur Limited)	

- Because last year's immunization products are recorded under a pseudo-DIN, you should also search for each of this year's products by drug name (not by DIN) and inactivate the drug cards for last year's products.

In the example below, there are two Fluviral drug records in the system. This year's product uses the correct DIN and last year's product is recorded under a pseudo-DIN.

File Edit Recent Search Utilities NH Cards Session Help

5. Call up the record that uses the pseudo-DIN and inactivate it. Note that drug records that use a pseudo-DIN will show **General Fee For Service** in the **Fee for Svc.** field.

The screenshot shows a software window with a menu bar (File, Edit, Recent, Drug, Reports, Utilities, NH, Central Fill, Cards, Session, Help) and a toolbar with buttons for F3 - Patient, F5 - Drug, F7 - Doctor, F9 - Workflow, F11 - Drop-off, F12 - New Rx, and Alt+X - Start. The main area contains a form for a drug record:
