

# Virtual consultation

## Patient guide

---

### What is a virtual consultation?

Virtual consultations are available to pharmacy patients as a way for you to connect directly with your pharmacy team via video from the comfort of your home using your smartphone, tablet or computer.

As with in-person consultations, virtual consultations are conducted as private conversations between you and your pharmacist to discuss topics related to your medication.

### Preparing for a successful virtual consultation.

Virtual consultations may seem intimidating. As with most things, preparation is key. Here are a few tips to help ensure you make the most out of your appointment:

#### You will need:

- A webcam-enabled computer, smartphone or tablet with good quality speakers, a microphone and a web browser
- An internet (wi-fi) or a phone data plan (for connections via mobile device)
- A stable internet connection
- A quiet indoor space with little distraction and good lighting

**Take a moment to jot down any questions** that you want to discuss with your pharmacist. It's a good idea to write down a few notes in advance to make the best use of your time during your virtual consultation.

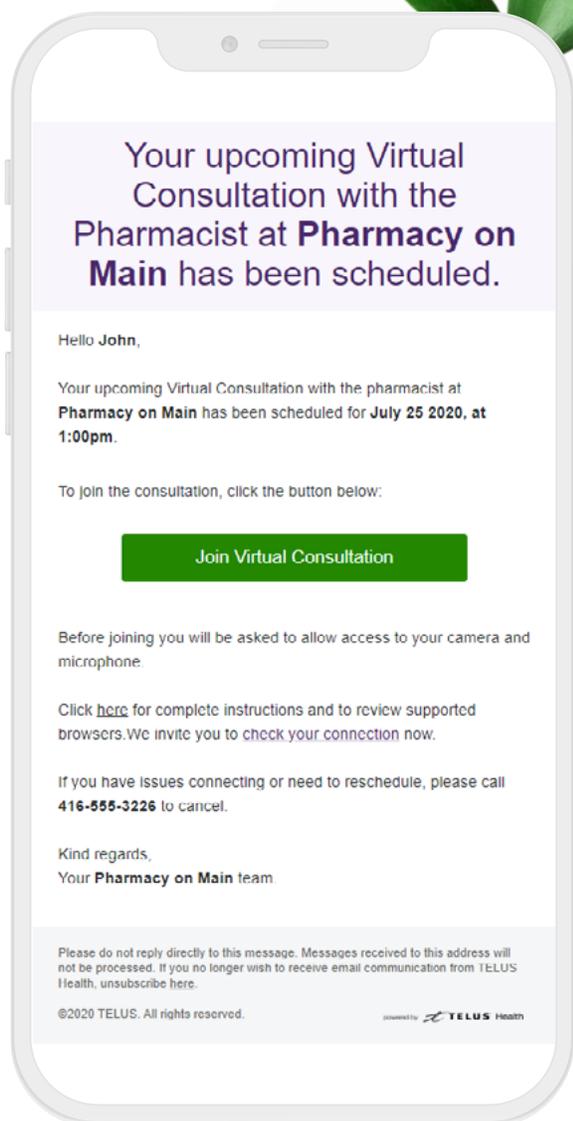

**Have a pen and paper handy** in case you want to take notes from your consultation.

**Consider having someone join you**, either in-person or virtually. Depending on the type of consultation, it may be helpful to have a family member, trusted friend or caregiver sit in to take notes or raise concerns in case you forget something. If the individual can't be in the same location as you, share the link and they can connect from any internet enabled computer or mobile device.

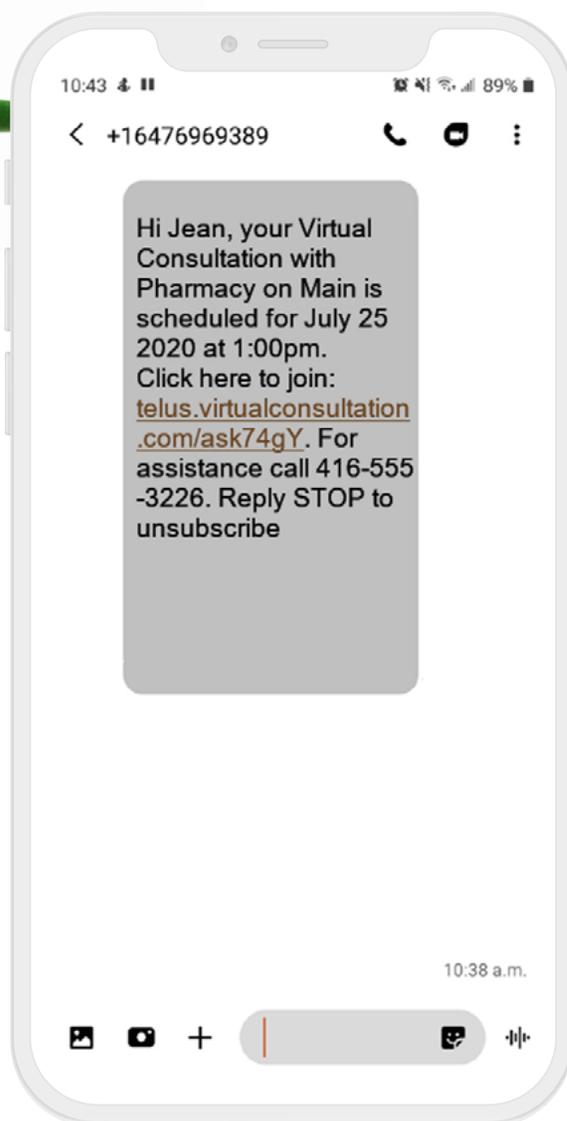

## Joining your virtual consultation.

1. Five minutes ahead of your scheduled appointment time, click on the **Join Virtual Consultation** link that your pharmacy shared with you via SMS (text message) or email.

### Sample email invitation:

### Sample SMS (text message) invitation:

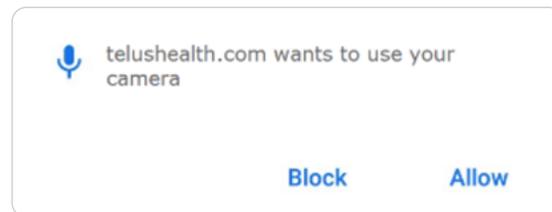

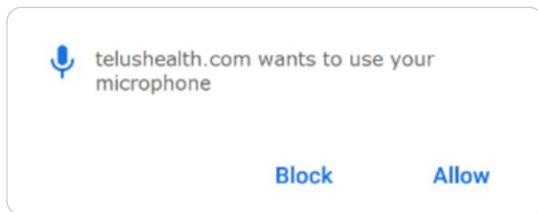

**Note:** If this is your first virtual consultation with your pharmacist, we recommend that you test your device connection. To do so, ensure that you are using a smartphone, tablet or computer with both camera and microphone access. Once you have selected an appropriate device, click on the testing link provided in the SMS or email message from your pharmacy.

Your device must have one of the following operating systems and subsequent browsers for the virtual consultation to be launched:

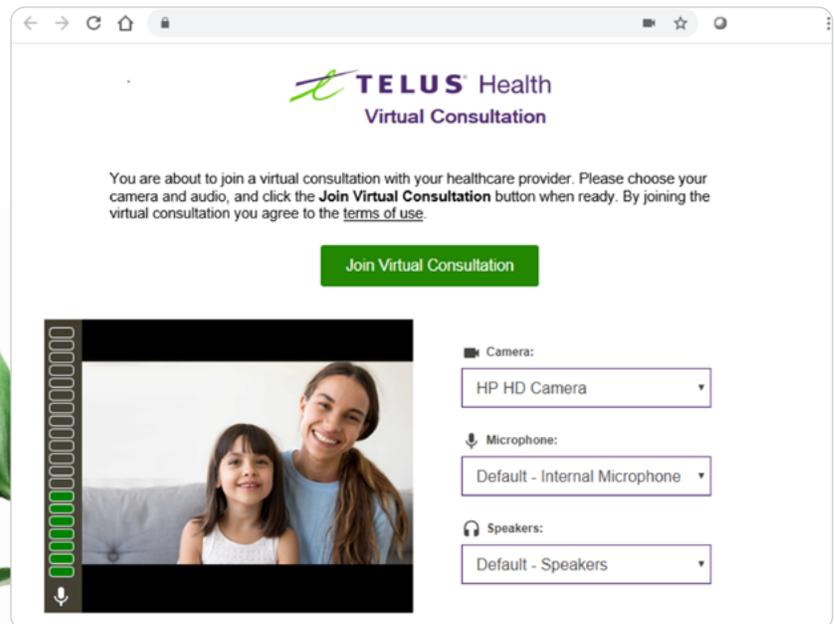

- Mac OS X 10.12 and later - latest version of Chrome, Firefox or Safari
- Windows 7 or Windows 10 - latest version of Chrome, Firefox or Microsoft Edge
- iOS 11 and later - latest version of Safari
- Android 9 and later - latest version of Chrome
- Chrome OS - latest version of Chrome

2. You may be asked to allow access to your camera and microphone. If you are prompted to do so, please click “**allow**” for both.

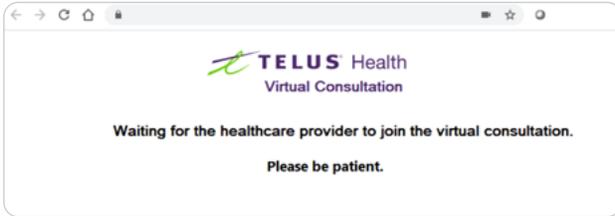

3. Ensure your camera and microphone are working correctly. You should see yourself on screen and solid bars next to the microphone icon on the left when speaking.

Change the selected microphone and camera using the dropdown menus if necessary.

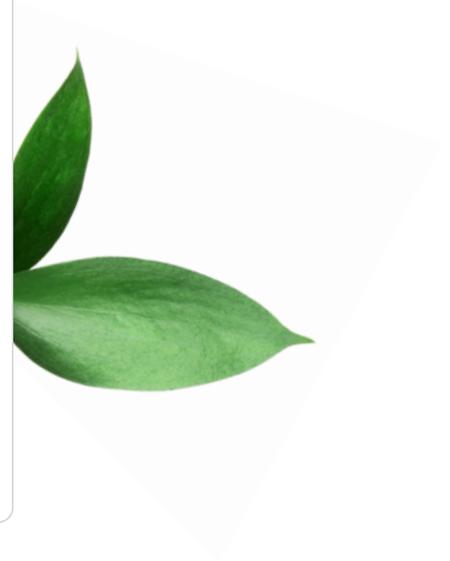

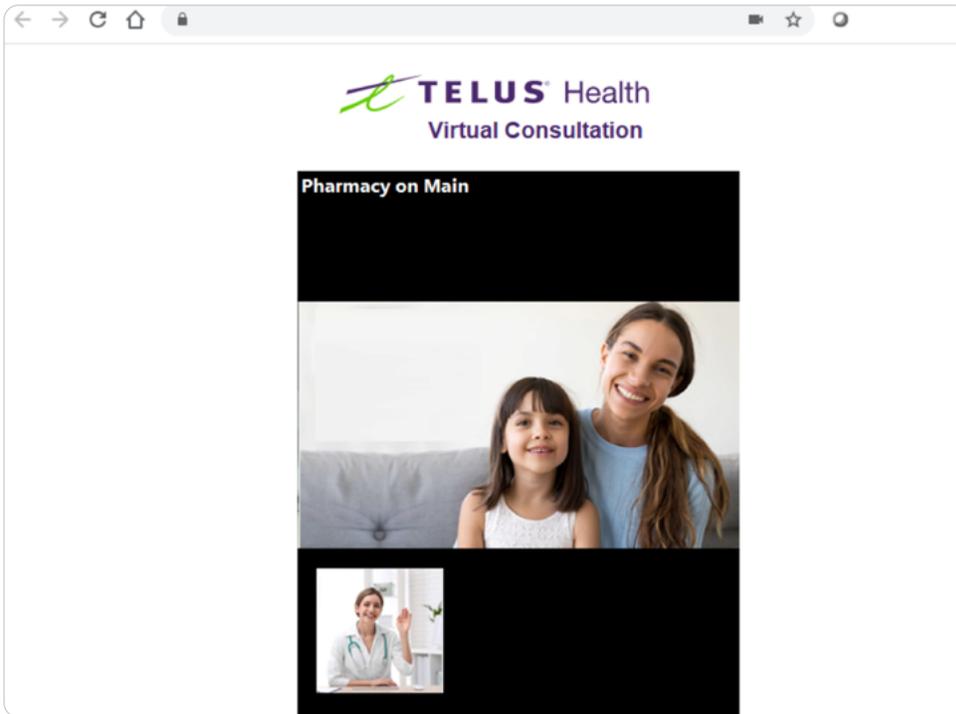

**Note:** You must have both video and audio access to connect. If you cannot connect, please contact your pharmacy.

- Once you have confirmed that your camera and microphone are working correctly, click the **Join Virtual Consultation** button. At the specified consultation time, your pharmacist will join. It may take a moment or two to connect.

- Once your pharmacist joins, they will appear on the screen with you. If needed, there is a chat feature that can be used during your video session.

- When your virtual consultation is complete the pharmacist will close the connection. At this time, you may close your internet browser to disconnect from the video call.
