

Ubik,
the future
of your
pharmacy
is now.

A
next-level
pharmacy
management
solution.

Ubik[™]

With Ubik, we have imagined the evolution of your profession to help you anticipate what is coming. We have integrated several tools to help you be more efficient in managing your prescriptions, planning, delivering, and documenting your clinical services and much more, without ever having to leave Ubik.

Our pharmacy management solution brings together everything you need in one place, in a simple and intuitive way, giving you the flexibility to carry out several tasks at the same time:

**Clinical services
management.**

**Prescription
management.**

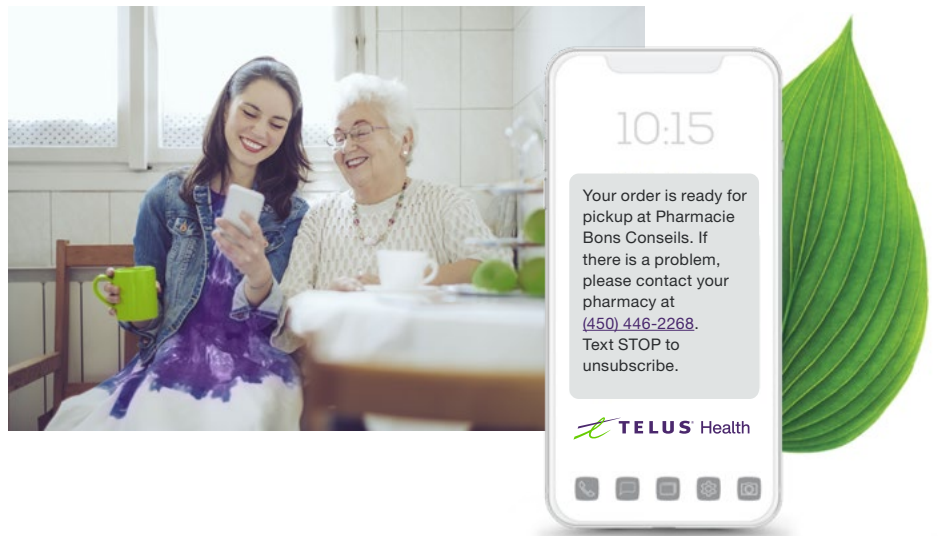

**Online tools
for patients.**

Ubik is here to help you better manage all of your laboratory activities so that you and your team can devote more time to **what is most important: serving your patients.**

24/7
access to
your pharmacy,
for all your
patients.

Thanks to Ubik, you can stay in touch with your patients and help optimize your team's time management. Ubik lets your patients learn about their medications remotely and request prescription refills online. You can also notify them by SMS or email when their prescription is ready. Your patients can book appointments online and receive confirmations, which helps reduce call volume.

Do more,
with peace
of mind.

Switching to Ubik is as easy as 1-2-3

- 1 A simple integration process based on your pharmacy's needs for a hassle-free transition.
- 2 Personalized support for preparing and training your teams.
- 3 Support from our experts to make sure everything is going as planned.

We have a dedicated team ready to actively collaborate with you from the moment your transition begins, but also after implementation.

A more efficient solution for more than 85%* of pharmacies that have migrated to Ubik.

We know that each pharmacy is unique, which is why our pharmacy solution is not meant to be a one-size-fits-all model. We have already supported several pharmacies in their transition to Ubik, adapting to each one's specific needs.

“Thanks to this system, we can provide very effective management of chronic diseases and respond to each of our client's specific requests.”
